

Röchling Fibracon Ltd.

Scopic recently carried out both X-ray and metal detectable testing with Röchling Engineering Plastics, to ensure peak performance of their PTFE material developed for seals within the food industry. Through a series of in-house developments and procurements over the past few months, Scopic are proud to now be able to offer extensive in-house testing to their customers.

Coronavirus

The
**SteriTouch®
Stance**

As the Coronavirus (COVID-19) becomes a growing global concern, SteriTouch have been approached by a number of customers asking for advice and our stance on the use of antimicrobial technology to combat the spread of COVID-19 and other viruses. We are continuing to be as reactive and as supportive as possible to our customers, who have valid concerns over the current situation.
